

## Introduction to Installing and Managing Microsoft Exchange Server 2007

**Days:** 3  
**Format:** Instructor-Led  
**Certification Exams:** None  
**Certification Track:** None

### Recommended Course Sequence

Knowledge of prerequisites noted below.

*Course content is subject to change without notice.*

### Course Description:

Elements of this syllabus are subject to change. At the end of this three-day course, students who are new to Exchange Server will learn how to configure and manage a messaging environment in accordance with technical requirements. Students will learn how to install Exchange Server 2007 and manage routing, client access, and the backup and restore of databases. They will also learn how to manage addressing and recipient objects such as mailboxes, distribution groups, and contacts.

### Target Student:

IT Professionals, IT generalists, and help desk professionals who want to learn about Microsoft Exchange Server 2007 are the audience for this course. IT Professionals, IT generalists and help desk professionals should have at least 3 years experience working in the IT field. No experience with Exchange Server is necessary.

### Prerequisites:

This course requires that students meet the following prerequisites:

- Experience using these tools and applications:
- NTBackup command.
- NSLookup command.
- Windows Explorer
- Microsoft Management Console (MMC)
- Active Directory Users and Computers
- Active Directory Sites and Services
- Internet Information Services (IIS) Admin
- Outlook
- Working knowledge of Windows server operating system. For example, how storage is configured, basic backup and restores techniques, and what a client/server application interaction means.
- Working knowledge of network technologies. For example, what Transmission Control Protocol (TCP/IP) and Domain Name System (DNS) do and how to use them, basic routing concepts (Wide Area Networks (WAN) vs. Local Area Network (LAN) router vs. switch vs. hub).
- Working knowledge of Active Directory. For example, how user objects are managed, what is stored in Active Directory partitions, basic architectures (domain, forest, sites, etc.), and how domain controllers are managed. Site and site connector configuration, schema, configuration partitions, and Global Catalogs.
- Conceptual understanding of e-mail technologies For example, that Simple Mail Transport Protocol (SMTP) is a protocol used for e-mail and the differences between transport protocols and client access protocols (Post Office Protocol (POP), Internet Access Message Protocol (IMAP), SMTP).

---

## At Course Completion:

After completing this course, students will gain the skills to:

- Describe how Exchange Server 2007 and Active Directory work together.
- Install Exchange Server 2007.
- Configure Mailbox Server roles.
- Manage recipient objects.
- Manage e-mail and address lists.
- Manage client access.
- Manage Messaging Transport.
- Manage availability, backup and recovery.
- Maintain the message system.

## Course Outline

### Module 1: Overview of Exchange and Active Directory

After completing this module, students will be able to describe how Exchange Server 2007 and Active Directory work together.

Lessons
<ul style="list-style-type: none"><li>■ Overview of Microsoft Exchange Server 2007 and Active Directory, Directory Service.</li><li>■ Introduction to the Integration of Active Directory and Exchange Server 2007</li></ul>
Lab : Overview of How Active Directory and Exchange Server 2007 Work Together
<ul style="list-style-type: none"><li>■ Discussion: Explaining How Exchange and Active Directory Work Together</li></ul>

### Module 2: Installing Exchange Server 2007

After completing this module, students will be able install Exchange Server 2007.

Lessons
<ul style="list-style-type: none"><li>■ Introduction to the Exchange Server 2007 Server Roles</li><li>■ Installing Exchange Server 2007</li><li>■ Completing the Exchange Server 2007 Installation</li></ul>
Lab : Installing Exchange Server 2007
<ul style="list-style-type: none"><li>■ Preparing the Environment for an Exchange Server 2007 Installation</li><li>■ Installing Exchange</li></ul>
Lab : Verifying an Exchange Server 2007 Installation
<ul style="list-style-type: none"><li>■ Verifying an Exchange Server 2007 Installation</li></ul>

# Introduction to Installing and Managing Microsoft Exchange Server 2007

## Module 3: Configuring Mailbox Server Roles

After completing this module, students will be able to configure Mailbox Server roles.

Lessons
<ul style="list-style-type: none"><li>■ Overview of Exchange Server 2007</li><li>■ Implementing Mailbox Server Roles</li><li>■ Managing Public Folder Database</li></ul>
Lab : Configuring Mailbox Servers
<ul style="list-style-type: none"><li>■ Configuring Storage Groups and Database Files</li><li>■ Configuring a Public Folder and Store Referrals</li></ul>

## Module 4: Managing Recipient Objects

After completing this module, students will be able to manage recipient objects.

Lessons
<ul style="list-style-type: none"><li>■ Managing Mailboxes</li><li>■ Managing Other Recipients</li><li>■ Overview of Managing Public Folders</li></ul>
Lab : Managing Recipient Objects
<ul style="list-style-type: none"><li>■ Modifying Existing Mailboxes</li><li>■ Configuring New Mailboxes and Mail-Enabled Objects</li><li>■ Managing Resource Mailboxes</li><li>■ Managing Mailbox Removal</li></ul>

## Module 5: Managing E-Mail Addresses and Address Lists

After completing this module, students will be able to manage e-mail and address lists.

Lessons
<ul style="list-style-type: none"><li>■ Configuring E-Mail Address Policies</li><li>■ Configuring Address Lists</li><li>■ Overview of Bulk Recipient Management Tasks</li></ul>
Lab : Managing E-Mail Addresses and Address Lists
<ul style="list-style-type: none"><li>■ Managing E-Mail Address Policies</li><li>■ Managing Address Lists</li><li>■ Performing Recipient Bulk Management Tasks</li></ul>

---

## Module 6: Managing Client Access

After completing this module, students will be able to manage client access.

Lessons
<ul style="list-style-type: none"><li>■ Implementing Client Access Servers</li><li>■ Implementing Client Access Features</li><li>■ Implementing Outlook Web Access</li><li>■ Introduction to Implementing Mobile Messaging</li></ul>
Lab : Managing Client Access
<ul style="list-style-type: none"><li>■ Configuring Client Protocols</li><li>■ Managing Outlook Web Access Connectivity</li><li>■ Managing Mobile Device Connectivity</li></ul>

## Module 7: Managing Messaging Transport

After completing this module, students will be able to manage messaging transport.

Lessons
<ul style="list-style-type: none"><li>■ Introduction to Message Transport</li><li>■ Implementing Message Transport</li></ul>
Lab : Managing Messaging Transport
<ul style="list-style-type: none"><li>■ Troubleshooting Local Message Delivery</li><li>■ Troubleshooting Remote Message Delivery</li><li>■ Discussion: Troubleshooting Message Transport</li></ul>

## Module 8: Managing Availability, Backup and Recovery

After completing this module, students will be able to manage availability, and backup and recovery.

Lessons
<ul style="list-style-type: none"><li>■ Implementing High-Availability for Mailbox Servers</li><li>■ Managing a Backup Solution</li><li>■ Managing a Recovery Solution</li></ul>
Lab : Managing Backup and Recovery
<ul style="list-style-type: none"><li>■ Backing Up and Restoring Mailbox Databases</li><li>■ Restoring Mailbox Databases using Local Continuous Replication (LCR)</li><li>■ Restoring Data using the Recovery Storage Group</li></ul>

## Module 9: Maintaining the Messaging System

After completing this module, students will be able to maintain the message system.

<b>Lessons</b>
<ul style="list-style-type: none"><li>■ Overview of Implementing Change Management</li><li>■ Overview of Updating Exchange Servers</li></ul>
<b>Lab : Maintaining the Messaging System</b>
<ul style="list-style-type: none"><li>■ Determining the Information Necessary for Change Management Request</li></ul>
