

BUILDING TRAINING SOLUTIONS
FOR THE IT WORLD

Installing and Configuring Windows 7 Client

Days:	3
Format:	Instructor-Led
Class Code	6292
Certification Exams:	70-680
Certification Track:	None

Recommended Course Sequence

Knowledge of prerequisites
noted below.

*Course content is subject to change
without notice.*

Course Description:

This three-day instructor-led Microsoft training course is intended for IT professionals who are interested in expanding their knowledge base and technical skills about Windows 7 Client. In this course, students learn how to install, upgrade, and migrate to Windows 7 client. Students then configure Windows 7 client for network connectivity, security, maintenance, and mobile computing. This course helps students prepare for the Exam 70-680, TS: Windows 7, Configuring.

Target Student:

This course is intended for IT professionals who are interested in:

- Expanding their knowledge base and technical skills about Windows 7 Client.
- Acquiring deep technical knowledge of Windows 7.
- Learning the details of Windows 7 technologies.
- Focusing on the "how to" associated with Windows 7 technologies.

Most of these professionals use some version of Windows client at their work place and are looking at new and better ways to perform some of the current functions.

Delivery Method:

Instructor led, group-paced, classroom-delivery learning model with structured hands-on activities.

Prerequisites:

Before attending this course, students must have:

- Experience installing PC hardware and devices.
- Basic understanding of TCP/IP and networking concepts.
- Basic Windows and Active Directory knowledge.
- The skills to map network file shares.
- Experience working from a command prompt.
- Basic knowledge of the fundamentals of applications. For example, how client computer applications communicate with the server.
- Basic understanding of security concepts such as authentication and authorization.
- An understanding of the fundamental principles of using printers.

Installing and Configuring Windows 7 Client

At Course Completion:

Upon successful completion of this course, students will be able to:

- Perform a clean installation of Windows 7, upgrade to Windows 7, and migrate user-related data and settings from an earlier version of Windows.
- Configure disks, partitions, volumes, and device drivers to enable a Windows 7 client computer.
- Configure file access and printers on a Windows 7 client computer.
- Configure network connectivity on a Windows 7 client computer.
- Configure wireless network connectivity on a Windows 7 client computer.
- Secure Windows 7 client desktop computers.
- Optimize and maintain the performance and reliability of a Windows 7 client computer.
- Configure mobile computing and remote access settings for a Windows 7 client computer.

Course Outline

Module 1: Installing, Upgrading, and Migrating to Windows 7

This module explains how to install, upgrade and migrate to Windows 7. It also describes the key features, editions, and hardware requirements of Windows 7.

Lessons
<ul style="list-style-type: none">■ Preparing to Install Windows 7■ Performing a Clean Installation of Windows 7■ Upgrading and Migrating to Windows 7■ Performing Image-based Installation of Windows 7■ Configuring Application Compatibility
Lab : Installing and Configuring Windows 7
<ul style="list-style-type: none">■ Migrating Settings by using Windows Easy Transfer■ Configuring a Reference Image of Windows 7■ Configuring a Reference Image

Module 2: Configuring Disks and Device Drivers

This module examines how to configure disks, partitions, volumes, and device drivers to enable Windows 7 to function as desired.

Lessons
<ul style="list-style-type: none">■ Partitioning Disks in Windows 7■ Managing Disk Volumes■ Maintaining Disks in Windows 7■ Installing and Configuring Device Drivers
Lab : Configuring Disks and Device Drivers
<ul style="list-style-type: none">■ Configuring Disks■ Configuring Disk Quotas (Optional)■ Updating a Device Driver

Installing and Configuring Windows 7 Client

Module 3: Configuring File Access and Printers on Windows 7 Client Computers

This module explains how to manage access to shared folders and printers on a computer running Windows 7. Specifically, it describes how to share and secure folders, configure folder compression, and how to install, configure, and administer printing.

Lessons
<ul style="list-style-type: none">■ Overview of Authentication and Authorization■ Managing File Access in Windows 7■ Managing Shared Folders■ Configuring File Compression■ Managing Printing
Lab : Configuring File Access and Printers on Windows 7 Client Computers
<ul style="list-style-type: none">■ Create and Configure a Public Shared Folder for all Users■ Configuring Shared Access to Files for Specific Users■ Creating and Sharing a Printer

Module 4: Configuring Network Connectivity

This module explains both IPv4 and IPv6 network connectivity. It also describes how to implement automatic IP Address Allocation and troubleshoot network connectivity.

Lessons
<ul style="list-style-type: none">■ Configuring IPv4 Network Connectivity■ Configuring IPv6 Network Connectivity■ Implementing Automatic IP Address Allocation■ Overview of Name Resolution■ Troubleshooting Network Issues
Lab : Configuring Network Connectivity
<ul style="list-style-type: none">■ Configuring IPv4 Addressing■ Configuring IPv6 Addressing■ Troubleshooting Network Connectivity

Module 5: Configuring Wireless Network Connections

This module describes key wireless network technologies and how to configure wireless network components and the Windows 7 elements that are necessary to access wireless networks.

Lessons
<ul style="list-style-type: none">■ Overview of Wireless Networks■ Configuring a Wireless Network• Troubleshooting Network Issues
Lab : Configuring Wireless Network Connections
<ul style="list-style-type: none">■ Determining the appropriate configuration for a wireless network■ Troubleshooting Wireless Connectivity

Installing and Configuring Windows 7 Client

Module 6: Securing Windows 7 Desktops

This module describes how to make a Windows 7 computer more secure while ensuring usability is not sacrificed in the process. Specifically, it describes Windows Firewall, User Account Control, Windows Defender, and Security in Internet Explorer 8.

Lessons
<ul style="list-style-type: none">■ Overview of Security Management in Windows 7■ Securing a Windows 7 Client Computer by Using Local Security Policy Settings■ Securing Data by Using EFS and BitLocker■ Configuring Application Restrictions■ Configuring User Account Control■ Configuring Windows Firewall■ Configuring Security Settings in Internet Explorer 8■ Configuring Windows Defender
Lab : Configuring UAC, Local Security Policies, EFS, and AppLocker
<ul style="list-style-type: none">■ Using Action Center■ Configuring Local Security Policies■ Encrypting Data■ Configuring AppLocker
Lab : Configuring Windows Firewall, Internet Explorer 8 Security Settings, and Windows Defender
<ul style="list-style-type: none">■ Configuring Windows Firewall■ Configuring Internet Explorer 8 Security■ Configuring Windows Defender

Installing and Configuring Windows 7 Client

Module 7: Optimizing and Maintaining Windows 7 Client Computers

This module describes how to use the monitoring and configuration tools to obtain information about Windows 7 performance and how to troubleshoot performance and reliability problems.

Lessons
<ul style="list-style-type: none">■ Maintaining Performance by Using the Windows 7 Performance Tools■ Maintaining Reliability by Using the Windows 7 Diagnostic Tools■ Backing Up and Restoring Data by Using Windows Backup■ Restoring a Windows 7 System by Using System Restore Points■ Configuring Windows Update
Lab : Optimizing and Maintaining Windows 7 Client Computers
<ul style="list-style-type: none">■ Monitoring System Performance■ Backing Up and Restoring Data■ Configuring System Restore Points■ Configuring Windows Update

Module 8: Configuring Mobile Computing and Remote Access in Windows 7

This module explains how to configure mobile devices and remote access. It also discusses DirectAccess and BranchCache which are new for Windows 7.

Lessons
<ul style="list-style-type: none">■ Configuring Mobile Computer and Device Settings■ Configuring Remote Desktop and Remote Assistance for Remote Access■ Configuring DirectAccess for Remote Access■ Configuring BranchCache for Remote Access
Lab : Configuring Mobile Computing and Remote Access in Windows 7
<ul style="list-style-type: none">■ Creating a Sync Partnership■ Configuring Power Options■ Enabling Remote Desktop■ Enabling BranchCache
