

BUILDING TRAINING SOLUTIONS
FOR THE IT WORLD

Number of Days: 5
Format: Instructor-Led
Class Code N+
Certification Exams: N10-004
JK0-016
Certification Track: N+
Recommended Course Sequence

Knowledge of prerequisites
noted below.

*Course content is subject to change

CompTIA Network+ (2009 Objectives)

Course Description:

The CompTIA Network+ (2009 Objectives) course builds on your existing user-level knowledge and experience with personal computer operating systems and networks to present fundamental skills and concepts that you will use on the job in any type of networking career. If you are pursuing a CompTIA technical certification path, the CompTIA A+ certification is an excellent first step to take before preparing for the CompTIA Network+ certification.

Target Student:

This course is intended for entry-level computer support professionals with basic knowledge of computer hardware, software, and operating systems, who wish to increase their knowledge and understanding of networking concepts and skills to prepare for a career in network support or administration, or to prepare for the CompTIA Network+ (2009 Objectives)

Prerequisites:

Before attending this course, students must also have:

- CompTIA A+ certification, or the equivalent skills and knowledge, is helpful but not required.
- Students may wish to take the following Element K course: CompTIA A+ Certification: A Comprehensive Approach for all 2006 Exam Objectives.

A typical student in the CompTIA Network+ (2009 Objectives) course should have nine months or more of professional computer support experience as a PC technician or help desk technician.

Delivery Method:

Instructor led, group-paced, classroom-delivery learning model with structured hands-on activities.

CompTIA Network+ (2009 Objectives)

After Course Completion:

After completing this course, students will be able to:

- Identify the basic components of network theory.
- Identify the major network communications methods.
- Identify network data delivery methods.
- List and describe network media and hardware components.
- Identify the major types of network implementations.
- Identify the components of a TCP/IP network implementation.
- Identify the major services deployed on TCP/IP networks.
- Identify the components of a LAN implementation.
- Identify the components of a WAN implementation.
- Identify major issues and technologies in network security.
- Identify the components of a remote network implementation.
- Identify major issues and technologies in disaster recovery.
- Identify major data storage technologies and implementations.
- Identify the primary network operating systems.
- Explore tools, methods, and techniques used in managing a network.
- Describe how to troubleshoot network issues.

Course Outline

Lesson 1: Network Theory
<ul style="list-style-type: none">■ Topic 1A: Networking Terminology■ Topic 1B: Network Building Blocks■ Topic 1C: Standard Network Models■ Topic 1D: Network Topologies■ Topic 1E: Network Categories
Lesson 2: Network Communications Methods
<ul style="list-style-type: none">■ Topic 2A: Transmission Methods■ Topic 2B: Media Access Methods■ Topic 2C: Signaling Methods
Lesson 3: Network Data Delivery
<ul style="list-style-type: none">■ Topic 3A: Data Addressing and Delivery■ Topic 3B: Network Connection Mechanisms■ Topic 3C: Reliable Delivery Techniques
Lesson 4: Network Media and Hardware
<ul style="list-style-type: none">■ Topic 4A: Bounded Network Media■ Topic 4B: Unbounded Network Media■ Topic 4C: Noise Control■ Topic 4D: Network Connectivity Devices

CompTIA Network+ (2009 Objectives)

Lesson 5: Network Implementations
<ul style="list-style-type: none">■ Topic 5A: The OSI Model■ Topic 5B: Client Network Resource Access■ Topic 5C: Ethernet Networks■ Topic 5D: Token Ring Networks■ Topic 5E: Fiber Distributed Data Interface (FDDI) Networks■ Topic 5F: Wireless Technologies and Standards
Lesson 6: Networking with TCP/IP
<ul style="list-style-type: none">■ Topic 6A: Families of Protocols■ Topic 6B: The TCP/IP Protocol■ Topic 6C: Default IP Addresses■ Topic 6D: Custom IP Addresses■ Topic 6E: The TCP/IP Protocol Suite
Lesson 7: TCP/IP Services
<ul style="list-style-type: none">■ Topic 7A: IP Address Assignment Methods■ Topic 7B: Host Name Resolution■ Topic 7C: NetBIOS Name Resolution■ Topic 7D: TCP/IP Utilities■ Topic 7E: TCP/IP Upper-layer Services■ Topic 7F: TCP/IP Interoperability Services
Lesson 8: Other Network Protocols
<ul style="list-style-type: none">■ Topic 8A: The NetBEUI Protocol■ Topic 8B: The IPX/SPX Protocol■ Topic 8C: The AppleTalk Protocol■ Topic 8D: The IP Version 6 (IPv6) Protocol
Lesson 9: Local Area Network (LAN) Infrastructure
<ul style="list-style-type: none">■ Topic 9A: Bridges and Switches■ Topic 9B: IP Routing Topology■ Topic 9C: Static IP Routing■ Topic 9D: Dynamic IP Routing■ Topic 9E: Controlling Data Movement with Filters and VLANs
Lesson 10: Wide Area Network (WAN) Infrastructure
<ul style="list-style-type: none">■ Topic 10A: WAN Switching Technologies■ Topic 10B: WAN Transmission Technologies■ Topic 10C: WAN Connectivity Methods■ Topic 10D: Voice Over Data Systems
Lesson 11: Network Security
<ul style="list-style-type: none">■ Topic 11A: Network Threats■ Topic 11B: Virus Protection■ Topic 11C: Local Security■ Topic 11D: Network Authentication Methods■ Topic 11E: Data Encryption■ Topic 11F: Internet Security

CompTIA Network+ (2009 Objectives)

Lesson 12: Remote Networking
<ul style="list-style-type: none">■ Topic 12A: Remote Network Architectures■ Topic 12B: Terminal Services Implementations■ Topic 12C: Remote Access Networking Implementations■ Topic 12D: Virtual Private Networking (VPN)
Lesson 13: Disaster Recovery
<ul style="list-style-type: none">■ Topic 13A: Planning for Disaster Recovery■ Topic 13B: Data Backup■ Topic 13C: Fault Tolerance Methods
Lesson 14: Network Data Storage
<ul style="list-style-type: none">■ Topic 14A: Enterprise Data Storage Techniques■ Topic 14B: Clustering■ Topic 14C: Network Attached Storage (NAS)■ Topic 14D: Storage Area Network (SAN) Implementations
Lesson 15: Network Operating Systems
<ul style="list-style-type: none">■ Topic 15A: Microsoft Operating Systems■ Topic 15B: Novell NetWare■ Topic 15C: UNIX and Linux Operating Systems■ Topic 15D: Macintosh Networking
Lesson 16: Network Troubleshooting
<ul style="list-style-type: none">■ Topic 16A: Troubleshooting Models■ Topic 16B: TCP/IP Troubleshooting Utilities■ Topic 16C: Hardware Troubleshooting Tools■ Topic 16D: System Monitoring Tools■ Topic 16E: Network Baselineing
Appendix
<ul style="list-style-type: none">■ Appendix A: Mapping Element K Course Content to the CompTIA Network+ Exam Objectives■ Appendix B: OSPF Route Discovery and Maintenance■ Appendix C: Additional IP Addressing and Subnetting Practice■ Supplemental Lesson Additional IP Addressing and Subnetting Practice
