Course Description:

Microsoft Project 2007: Level 2 is the second course in the Microsoft Project 2007 series. In Microsoft Project 2007: Level 1, you used your project management skills to create a complete project plan. The plans need to be updated and modified regularly to keep the project moving on track. This course will build upon the knowledge gained, and give you the opportunity to work with a project plan once it reaches the project implementation phase

Course Objective:

You will exchange project plan data with other applications, update project plans, create visual reports, and reuse project plan information

Target Student:

This course is designed for a person who has an understanding of project management concepts, who is responsible for creating and modifying project plans, and who needs a tool to manage these project plans. It is also intended for a person who has a basic understanding of Microsoft Project 2003.

Delivery Method:

Instructor led, group-paced, classroom-delivery learning model with structured hands-on activities.

Prerequisites:

Students enrolling in this class should have

- An understanding of project management concepts
- Knowledge of a Windows operating system, XP or Vista
- Microsoft Office Project 2007: Level 1

Performance Base objectives:

Upon successful completion of this course, students will be able to:

- Exchange project plan data with other applications.
- Update a project plan.
- Manage project costs.
- Report project data visually.
- Reuse project plan information.

Microsoft Office Project 2007 Level 2
