Course Description:

You've created intranet sites using Microsoft® Windows® SharePoint® Services. There will be times when you would want to build sites that lay emphasis on your company's unique requirements and sites that align themselves with the company's unique brand identity. In this course, you will use Microsoft® SharePoint® Designer 2007 to customize your SharePoint sites and build a new subsite on the SharePoint services platform.

Target Student:

This course is intended for SharePoint web designers and SharePoint solution developers, who want to learn to customize SharePoint sites by enhancing the look and feel of a SharePoint site and also to create dynamic pages using Web Parts and workflows.

Prerequisites:

Students should have taken the Microsoft® Windows® SharePoint® Services 3.0: Level 1 course from Element K or have an equivalent knowledge.

Recommended, though not required, are the following courses:

- Microsoft® Windows® SharePoint® Services 3.0: Level 2
- Cascading Style Sheets (Third Edition)

Delivery Method:

Instructor led, group-paced, classroom-delivery learning model with structured hands-on activities.

At Course Completion:

Upon successful completion of this course, students will be able to:

- Familiarize yourself with the SharePoint Designer environment.
- Create a new subsite.
- Add content to a web page.
- Use Cascading Style Sheets to format a SharePoint site.
- Add basic functionality to web pages.
- Add SharePoint components to the site.
- Automate business processes with workflows.
